

WORLD OF RADIO #1102, produced Oct. 24, 2001 by Glenn Hauser

- \*On Sunday, Oct. 28 most SW broadcasters change frequencies and/or times; see last few weeks of DX Listening Digests for new schedules
- \*Not all of our outlets have confirmed new times and frequencies yet but tentative timeshifted schedules for WOR, COM and MR are at <https://www.angelfire.com/ok/worldofradio/radioskd.html>
- \*WBCQ, WWCN, WRN, and our AM and FM outlets shift us one UT hour later
- \*WBCQ: UT Thursdays 0030 and 0515 on 7415
- \*WWCN: Thu 2130 15685, Fri 1030 9475, Sat 0300 3215, Sun 0330 5070, Sun 0730 3210, Mon 0100 3215, 0600 3210, Tue 1200 15685
- \*WRN: Sat 1500 to NAM, 0900 to elsewhere (tentatively)
- \*RFPI keeps us at same UT all year, but seems one hour earlier by local clock in areas going off DST; still awaiting revival of 7445 with a new antenna; reports wanted for current 24h test on 15040
- \*DX Program list by John Norfolk updated frequently: <http://www.worldofradio.com/dxpgms.html>
- \*BBC WS changes affecting North America are contradictory; Antigua changes in mornings from 17 to one or two 15 MHz
- \*Antigua's 300 degree heading listed by Merlin actually crosses Miami, Crawford and Los Angeles, in reality to southern NAM!
- \*WYFR and Delano relays for ``Mexico`` leave 11 MHz for 9 and 6
- \*BBC decides to let Alistair Cooke continue Letters from America
- \*Rv Belgium new English schedule, all from relays
- \*R. France Internationale complete new schedule in English
- \*RDP International, Portugal orders new 300 kW SW transmitter and antennas for next year, from Thales, new conglomerate in France which has consumed many electronics firms
- \*Austrian Radio new B-01 schedule to North America
- \*R. Budapest, complete new English schedule
- \*R. Prague, English to North America again in morning, several times in evening and via WRMI one hour later
- \*R. Ukraine International new English schedule including which frequency carries the megawatt
- \*R. Bulgaria complete new English schedule all in xxx00 kHz
- \*Azerbaijan has new website including audio streaming, <http://www.aztv.az>
- \*V. of Turkey dedicating its Oct. 27 DX Corner to Gigi Lytle, who died about a year ago, Sat 2210 on 11845, but repeat could be at 0310 on 9655 or 0410 on new 6020
- \*Thanks to Tom McLaughlin, in memoriam Gigi Lytle, for financial support to World of Radio
- \*V. of Turkey English schedule, complete
- \*WOR 1102, P O Box 1684, Enid, OK 73702, USA: [wghauser@hotmail.com](mailto:wghauser@hotmail.com) and website <https://www.angelfire.com/ok/worldofradio/>
- \*Israel Radio winter frequencies in English, including 6 instead of 11 MHz from mid-December to end of February
- \*DX Listening Digest appearing almost every day, taxing my time and resources; refer to all recent issues for extensive coverage of the Afghanistan situation
- \*Pronouncing Tal`ban and Al Qa`ida with glottal stops

- \*Information Radio, the US PsyOps transmission on 8700-USB: missing occasionally, perhaps due to weather; speculation about its location; could be two separate sites morning and evening; CRW has evidence that it is Turkmenistan. Professionals and/or amateurs should have triangulated actual location by now
- \*Why strange frequency 8700? PsyOps may have relied on mistaken Afghan report last July showing 8700 instead of 7080 for V. of Shariah
- \*QSL address for Commando Solo: Lt. Edward E. Shank, 193rd Special Operations Wing, 81 Constellation Court, Middletown PA 17057; tapes accepted
- \*Info Radio MW frequencies confirmed, but never reported by DXers; third airborne MW frequency is relaying VOA and RFE/RL
- \*Balkh Province MW outlet, only Taliban station, monitored by BBCM
- \*But report says Taliban have set up five temporary stations; and another report from Taliban claims 1 kW mobile transmitter on the air one hour per day in afternoons (no frequencies)
- \*For another perspective on this, differing from mainstream media, listen to Freespeech Radio News via RFPI, UT 0000, 0600 and 1200
- \*Cambodia reported reactivated on 11 MHz band
- \*RKI relays via Canada will be one hour not only during new evening broadcast, but morning too
- \*Five technicians fired from RCI Sackville site, making it more dangerous for those left, around high voltage, no buddy system; see <http://www.geocities.com/rciaction> -- And four RCI staff in Montreal reassigned to CBC Domestic
- \*Steve Anderson of UPR: see Loren Cox's story in DXLD 1-154; police car he allegedly tried to cut in half with gunfire held off duty cop's girlfriend who was injured; \$5000 reward
- \*Rush Limbaugh accuses liberals of infecting selves with anthrax; where's the outrage against him?
- \*Iowa City X-bander heard on 4th harmonic clashing with Pyongyang
- \*V. of Nigeria heard erratically on 15 MHz outlet
- \*Mauritania has been running all night on 60m, even before Ramadan
- \*Channel Africa, South Africa, complete new English schedule
- \*LRA36, Antarctica, still on air, per report from Russia
- \*Colombian broadcaster studio-transmitter links on 300 MHz relayed to Europe by mistake 50 MHz lower over US military Fleetcom satellites
- \*RFPI invites participants to four 10-week study courses in Costa Rica, starting January 6; details at <http://www.rfpi.org/ipc.html>
- \*And RFPI does interactive workshops on racism in the media at North American universities, community groups
- \*R. Miskut, Nicaragua, still low power on SW, but also has X-bander
- \*Australian media site refers to Christian Voice instead as ``Voice International``
- \*Grove Enterprises says SW receiver sales have doubled or tripled
- \*Universal also selling more, and Ten-Tec RX-350 coming in December
- \*Propagation outlook from Boulder, Oct. 23; flux range 220-170-245
- \*Glenn Hauser, here, concluding with a Standard disclaimer, World of Radio 1102
